The roof rack for a car comprises a base (4) attached to the vehicle with a movable load deck (6). The load deck can slide w.r.t. the base in a direction transverse to the vehicle axis so that luggage can be more easily loaded whilst the load deck (6) is offset from the longitudinal axis of the vehicle.

The load deck is locked to the base in a central position locking pins during transit. (11pp Dwg.No.2/9)
